

## LT, LTP Option Menu

1. **Acc Energy:** setting which allow to chose between two accumulating energy modes Signed/Absolute. Signed mode, positive energy sign accumulate into import and negative energy sign accumulate to export. Absolute mode, all the energy accumulates to the import.
2. **Alarm On Button:** Red ball mark appears at the left buttons side in case this option is activated.
3. **M2 On D.In:** Activate the secondary meter to accumulate energy depending on digital in status.
4. **Demand Cycle:** Set demand cycle time to be 1, 2, 3, 4, 5, 10, 15, 20, 30 or 60 minutes.
5. **Demand Type:** Set demand calculation type to be Sliding window, Block or Thermal.
6. **Demand Sync:** Set demand synchronization type to be None, by D.In1, by Communication or by the Clock.
7. **Date Format:** Set date presentation format dd/mm/yy, mm/dd/yy, yy/mm/dd, mm-dd-yy or yy-mm-dd.
8. **DIN Energy:** Activate the digital in energy pulse feature.
9. **NO Calc CT 0:** present only the “real” measuring value from the current transform.
10. **Led Power Save:** Set after a while (minutes) the screen will enter power-save mode
11. **Pre-Paid Energy:** Activate prepaid meter mode.
12. **Measuring VL-L:** Force measuring the voltage between lines and ignore from the neutral line.
13. **Hide Password:** hide the password characters.
14. **Calculate Cur. L0:** Force calculating the current in neutral line (for LTP module).
15. **SunSet Output:** Digital out closed depending on the sunset settings.
16. **Fast D.In:** Activate the fast digital in mode (special hardware).
17. **Cur no volt:** In our meters, in order to receive a current reading, you must connect the voltage line, if you choose that option, you'll receive current reading, even the voltage lines are disconnected.
18. **No Min - Max:** If you choose that option, the minimal and maximal value disappear from screen.
19. **Arom mssr VL3:** if you connect aron connection, and if you choose that option, you must connect Line 3.
20. **Meter roll over:** you choose the reset point of the energy counter.
